ACQUIA

Faster Setup , More Secure, Better Quality Code & Managed Devops Tools

Creating a great developer workflow isn't easy...

Building amazing digital experiences takes more than just hosting. You need tools for planning your experience, building the code, testing & reviewing your code, and finally you need to deploy it to make it available to the world. This requires many different tools and services and the hard part is choosing the right ones, connecting them, and keeping them connected.

... At Acquia we eliminate the silos between Code, Users, and Data

Acquia provides the only end-to-end web platform for Drupal with a managed DevOps service. This will enable you to get your applications to market faster, improve code quality, and reduce security risk all with tools optimized specifically for Drupal.

Key Benefits Of Acquia's Dev Tools

Get To Market Fast

Eliminate Risk

Improve Code Quality With Automated Devops Processes

MANAGED DEVOPS SERVICE

CODE STUDIO

Code Studio is SaaS suite of developer tools, optimized for Drupal in partnership with GitLab.

From inception to launch, Acquia Code Studio provides the tools to plan, build, review, test, and deploy. All with built-in automation.

Features:

- ◆ AutoDevOps - Automatically build, test, and deploy your Drupal applications
- ◆ Issue Management (like JIRA)
- ◆ Code management and review tools (like GitHub)
- ◆ Automated checks for code security, quality, etc. (like RA)
- ◆ Automatic Updates for Drupal and Custom Code (like no one)

CLOUD IDE

Cloud IDE is a browser-based source code editor and a Drupal development stack running on the Cloud Platform.

It provides you with a place to write your code - as a service. You don't need to set up your local machine. Acquia will do it for you on the Cloud.

Features:

- ◆ Faster ramp-up time for developers
- ◆ Reduced maintenance
- ◆ Better quality code
- ◆ Faster performance
- ◆ Ready to debug with Xdebug
- ◆ Keep it SaaS, keep it safe
- ◆ ... and many more

CLOUD ACTIONS

Cloud Actions is a feature of Acquia Cloud Platform that accelerates deployment workflows.

It automates releases and ensures that they are easier, faster, and more reliable.

Features:

- ◆ User Interface (UI) for release automation
- ◆ No code required during deployment
- ◆ Default best-practices built in
- ◆ Customizable by environment
- ◆ Choose the ca's you want to execute. Backup DB, clear cache, and more...

"[With Cloud IDE] I now spend almost zero hours per week asking our lead architect for help with my development environment."
- Pete Wood AMD Web Developer
