ACQUIA
EXPERIENCE DIGITAL FREEDOM

WHY UPGRADE TO DRUPAL 9?

Unmatched flexibility and extensibility by harnessing **the power of the Drupal Community** and **7,800+ active modules** compatible with Drupal 9.

The ease of use of a **templated site builder** COMBINED with the **enterprise feature library, security, and scalability** of a traditional CMS.

A continuous innovation cycle that releases new capabilities and features twice a year to keep users up to date and competitive.

The option to **configure your CMS in a traditional or decoupled manner**. Giving organizations the ability to deploy content on any digital channel — web, mobile, conversational interface and more.

Enhanced performance with an improved caching mechanism, Big Pipe, page caching, block caching and Views caching available by default in its core.

Native JSON:API support for web service integrations with frontend apps, CRM, CDP, and ERP.

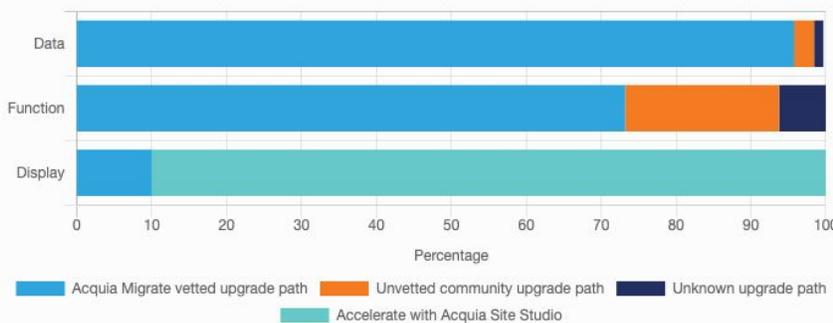

Assess your Drupal 7 Application Quickly and Easily

The Acquia Flight Path Assessment will help you identify the scope of migrating your site from Drupal 7 to Drupal 9. Using Acquia Migrate Accelerate, it will provide Acquia vetted and contributed migration paths for Drupal community modules.

Customers who take advantage of our free Acquia Flight Path Assessment can save up to:

- 2 weeks on content analysis
- 6 weeks in migration analysis
- \$20k USD in migration discovery costs

Saving time and money that can then be reinvested in the Drupal 9 build (e.g. migration, features or enhancements).

OPTIMIZE YOUR NEW D9 APPLICATION

Whether you are a digital marketer, a site builder, or a web developer, Acquia has tools to ensure the launch of your Drupal 9 site is successful.

Build your Drupal 9 Presentation with Low-code

Acquia Site Studio is a better way to design, build, and enhance your Drupal 9 site. By utilizing a low-code site building UI, accelerate the process of re-building your presentation layer on your D9 application.

Low Code

Allows anyone in your organization to create or change sites.

Reusable Components

Expedite your site build with drag and drop components.

Drag & Drop User Interface

Create unique layouts with the intuitive drag and drop Layout Canvas.

Style Guide Manager

Makes it easy and simple to maintain brand consistency across all your sites.

Build Code in the Cloud

With Acquia Cloud IDEs, you can make manual changes to your D9 application easier with a cloud-based development environment that enables developers to write code for the migration and use a command line interface all from their browser with no setup required.

Visual Code Editor

Make code changes seamlessly to your D9 site by copying code, files, and data from your Acquia environments to your Cloud IDE.

Integrated Dev Environment

Preconfigured development environment so you can spend less time on setup and more time migrating.
