

# ACQUIA

## DIY IS COSTING YOU MORE THAN YOU THINK

WHY HOSTING AND DEVELOPING WITH ACQUIA CAN SAVE YOU VALUABLE TIME AND MONEY

**In order to compete in today's fiercely competitive market, companies need a solution that will get them to market faster, be fully secure and compliant, and provide 24/7 support. DIY just can't do it.**

The allure of "Doing It Yourself" is that it's cheaper, but that's only true in the short run. Over time, your once simple and easy to use solution becomes a nightmare. This happens due to time and budgetary constraints which can lead to technical debt. Those "quick fixes" you do today, make maintenance and future integrations are more complex and often reliant on legacy technology.

Acquia's focus is to provide a highly available, scalable and future-proof platform that helps to relieve the burden of maintenance and reduce technical debt. With Drupal expertise to support your application, we can ensure you avoid throwing costly hardware at a performance challenge that can be mitigated by code changes.

**Acquia gets you to market fast, eliminates risk, and provides 99.95% SLA uptime 24/7/365 support. With Acquia you can have it all. We are the only Digital Experience Platform that makes it easy for all business users, from marketing to IT, to create memorable experiences for customers on the best enterprise platform.**

*Drupal is the preferred platform of 40% of the Fortune 1000 because of its extensibility and security*

**With Acquia, GTA was able to save \$4.7M over 5 years**

**With Acquia, GW was able to migrated 300+ sites in 7 weeks**

# DIY: PLATFORM BENEFITS

## Acquia Cloud Platform: World's best, fully managed Cloud Platform for Drupal

Acquia Cloud Platform is a fully managed platform for organizations to build, launch and manage their Drupal and Acquia CMS applications. It provides 99.95% uptime, platform & application security, development features, and specialized support for your CMS.

- ◆ Fully managed cloud platform
- ◆ Enterprise Security as a service
- ◆ Scalable architecture
- ◆ The only composable experience platform
- ◆ Run, Secure, and Scale with ease

## Acquia Edge: The right mix of speed and security

Acquia Edge Security ensures you have the best protection from day one by delivering enterprise-grade security, including a Web Application Firewall (WAF) and DDoS mitigation, to secure applications from malicious attacks and protect digital experiences. Along with access to hundreds of standard rulesets to block vulnerabilities and avoid reactionary disaster cleanup, you can eliminate the risk of digital experience security breaches to prevent negative brand impact and increase brand value.

- ◆ DDoS Protection
- ◆ Web Application and IP Firewall

## Acquia Site Factory: Multi-site management tool to build, govern, and enhance digital portfolios

Acquia Site Factory is the only platform that enables organizations to quickly build and effectively manage 100s or even 1000s of sites from one central platform. Site Factory makes it easy to enforce site governance, ensure site security, and reduce your time to market— all at scale.

- ◆ Central Site Management
- ◆ Governance Control
- ◆ Agile Site Creation
- ◆ Platform Security
- ◆ Deploy Content at Scale

## Edge Bot Manager: The visibility and control of bot traffic you never knew you needed

An additional layer of Edge Security, enabling you to gain heightened visibility and control of bot traffic to your digital experiences.

**THE LIFEBLOOD OF A DIGITAL EXPERIENCE IS CONTENT**

# DIY: MANAGED DEVOPS TOOLS

## CODE STUDIO

Code Studio is SaaS suite of developer tools, optimized for Drupal in partnership with GitLab.

From inception to launch, Acquia Code Studio provides the tools to plan, build, review, test, and deploy. All with built-in automation.

### Features:

- ◆ AutoDevOps - Automatically build, test, and deploy your Drupal applications
- ◆ Issue Management (like JIRA)
- ◆ Code management and review tools (like GitHub)
- ◆ Automated checks for code security, quality, etc. (like RA)
- ◆ Automatic Updates for Drupal and Custom Code (like no one)

## CLOUD IDE

Cloud IDE is a browser-based source code editor and a Drupal development stack running on the Cloud Platform.

It provides you with a place to write your code - as a service. You don't need to set up your local machine. Acquia will do it for you on the Cloud.

### Features:

- ◆ Faster ramp-up time for developers
- ◆ Reduced maintenance
- ◆ Better quality code
- ◆ Faster performance
- ◆ Ready to debug with Xdebug
- ◆ Keep it SaaS, keep it safe
- ◆ ... and many more

## CLOUD ACTIONS

Cloud Actions is a feature of Acquia Cloud Platform that accelerates deployment workflows.

It automates releases and ensures that they are easier, faster, and more reliable.

### Features:

- ◆ User Interface (UI) for release automation
- ◆ No code required during deployment
- ◆ Default best-practices built in
- ◆ Customizable by environment
- ◆ Choose the ca's you want to execute. Backup DB, clear cache, and more...

“[With Cloud IDE] I now spend almost zero hours per week asking our lead architect for help with my development environment.”

- Pete Wood AMD Web Developer

The AMD logo consists of the letters 'AMD' in a bold, sans-serif font, followed by a square icon containing a stylized 'A' shape.
